Education

Indian Institute of Technology, Madras
B.Sc. in Data Science,(Online) — *Sept. 2022 – present*

Dr. Ambedkar Institute of Technology
B.E. in Artificial Intelligence & Machine Learning, — *Dec. 2022 – June 2026*

Experience

Entropik — Jan 2026 – Present

Associate AI Engineer

- Improved Decode's AI-powered report generation pipeline for faster and more reliable reporting
- Improved the AI Moderator workflow by refining dynamic prompts, goal normalization, probing, stimulus handling, and live context.
- Built production-ready LangChain agents and copilots for contextual research study and metric queries.

AI QA Intern

- Supported Decode through benchmark scoring, LLM evaluation for AI Moderator, and LangChain workflows for creative research studies.

GeeksforGeeks – Campus Body, Dr.AIT — Dec 2025

Guest Speaker – RAG & Agentic AI Systems

- Delivered a session to **200+ attendees** on LLMs, RAG architectures, LangChain, and LangGraph-based agentic systems.

Google Developer Groups – DR.AIT — 2024 – 2025

Machine Learning Lead

- Led ML initiatives and delivered a 4-day bootcamp, teaching Linear Regression to **400+ participants**.
- Covered Python implementation, evaluation metrics, and real-world ML applications through hands-on sessions.

Projects

Datanaut.ai – Exploratory Data Analytics Tool — GitHub | Live

- Conversational data exploration platform with automatic SQL generation and interactive visualisations.
- Fast query execution with export-ready charts and responsive UI.

Heavy Equipment Resale Price Prediction — GitHub

- Built an end-to-end ML pipeline on 138K+ auction records with feature engineering, leakage-safe preprocessing, and model comparison.
- Tuned Ridge, Random Forest, and LightGBM, achieving 0.1978 validation RMSLE with LightGBM using cross-validation and target/frequency encoding.

Smart MCQ Solver – Deep Learning and NLP — Live

- Built a multiple-choice NLP system using 1D-CNN, fine-tuned DeBERTa-v3, and TF-IDF + Logistic Regression, optimized for MAP@3.
- Used GroupKFold validation and probability blending, achieving 0.682 MAP@3 OOF and 0.75 Kaggle LB; tracked experiments with W&B and deployed on Hugging Face.

Technical Skills

Languages: Python, C/C++, SQL (Postgres), HTML/CSS
Web Frameworks: Django, Streamlit
Tools: Git, Docker, Supabase, Google Cloud Platform, Render, Vercel, Tableau, VS Code, Jupyter Notebook, MS Excel, Sheets,Weights & Biases
Data Science & ML Libraries: NumPy, Pandas, Matplotlib, Seaborn, Plotly, NLTK, LangChain, RAG -Pipelines, Pytorch, Scikit-learn, OpenCV, spaCy, HuggingFace,
Practices: debugging, scalable services, secure integration (OAuth), LLM Evaluation, Leakage-Aware Cross-Validation (GroupKFold), Model Fine-Tuning
