EDUCATION

Indian Institute of Technology, Madras

B.Sc. in Data Science,(Online)

Sept. 2022 – present

Dr. Ambedkar Institute of Technology

B.E. in Artificial Intelligence & Machine Learning,

Dec. 2022 – present

EXPERIENCE

Entropik

Jan 2026 – Present

AI QA Intern

- Working closely with the Data Science team on the company's flagship product **Decode**, contributing to benchmark score calculations across advertisement categories.
- Contributed to Decode's Copilot Agent, which is an AI-powered assistant that enables users to summarise research studies and ask contextual questions, improving insight extraction from quantitative data.
- Built a **LangChain** based agent to extend the capabilities of the **Decode Copilot Agent** for AI-powered creative studies, enabling contextual reasoning, workflow orchestration, and enhanced interaction with research insights
- Assisted in updating and evaluating newer LLM versions within the AI Moderator pipeline to improve moderation accuracy and performance.

GeeksforGeeks – Campus Body, Dr.AIT

Dec 2025

Guest Speaker – RAG & Agentic AI Systems

- Delivered a session to **200+ attendees** on LLMs, RAG architectures, LangChain, and LangGraph-based agentic systems.
- Covered production-grade AI design, retrieval strategies, and scalable deployment through live demos.

Google Developer Groups – DR.AIT

2024 – 2025

Machine Learning Lead

- Led ML initiatives and delivered a 4-day bootcamp, teaching Linear Regression to **400+ participants**.
- Covered Python implementation, evaluation metrics, and real-world ML applications through hands-on sessions.

PROJECTS

Datanaut.ai – Exploratory Data Analytics Tool

[GitHub](#) | [Live](#)

- Conversational data exploration platform with automatic SQL generation and interactive visualisations.
- Fast query execution with export-ready charts and responsive UI.

Retail Orders – Data Analysis Project

[GitHub](#) | [Live](#)

- Built ETL pipeline using Kaggle API, Python, and PostgreSQL for structured sales analysis.
- Derived insights using SQL (YoY growth, regional trends) and visualized results via dashboard.

Genly.ai – AI-Powered Email Generator

[GitHub](#) | [Live](#)

- Django app using Mistral 7B (OpenRouter) for tone-aware email generation.
- Integrated Google OAuth + Gmail API for single/bulk sending with CSV personalization.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL (Postgres), HTML/CSS

Web Frameworks: Django, Streamlit

Tools: Git, Docker, Supabase, Google Cloud Platform, Render, Vercel, Tableau, VS Code, Jupyter Notebook, MS Excel, Sheets

Data Science & ML Libraries: NumPy, Pandas, Matplotlib, Seaborn, Plotly, NLTK, LangChain, RAG -Pipelines, Scikit-learn, OpenCV, spaCy, HuggingFace, llama3.1

Practices: debugging, scalable services, secure integration (OAuth), LLM Evaluation, QA Testing Lifecycles
